

XRPL Validator — Daily Engineering Report · 2026-05-04

Compiled retrospectively on 2026-09-23 from the git history. Scope: XRPL work only — the git history of [xrpl-validator](#) and the XRPL Rust SDK, the XRP Ledger itself (amendments) and XRPL research.

Summary

- 2 commits (xrpl-validator 2)

Engineering changes

- **perf(ffi): skip RPC fallback on state.rocks miss in steady state** (e4500ad , xrpl-validator) Empirical finding from instrumenting per-LedgerEntryType breakdown of RPC fallbacks: across 15,524 fallbacks in a 5k-tx window, rpc_sle_hits was 0 and rpc_sle_misses was 15,524. Every single fallback returned entryNotFound from rippled. State.rocks is complete; the "fallback rate" is purely libxrpl's apply path probing for SLEs that genuinely don't exist on chain ("does this account exist before I create it?", "is ...

Docs and operations

- **chore(watch_engine): rename "RPC FALLBACKS" → "STATE.ROCKS MISSES"** (1313bca , xrpl-validator)
