

XRPL Validator — Daily Engineering Report • 2026-05-15

Compiled retrospectively on 2026-09-23 from the git history. Scope: XRPL work only — the git history of [xrpl-validator](#) and the XRPL Rust SDK, the XRP Ledger itself (amendments) and XRPL research.

Summary

- 3 commits (xrpl-validator 3)

Engineering changes

- **fix(xrpl-node): parallelize ws-sync shadow fetches + drift watchdog** (3cf4e25 , xrpl-validator) Root cause of a state.rocks corruption cascade that surfaced on 2026-05-15 after 23 days of silent accumulation. The first divergence record was logged 2026-04-22; the signing gate (Phase 3) had been masking the rot because shadow-mode divergences don't block signing.

Docs and operations

- **chore(deps): upgrade Next.js dashboard to 15.5.18** (59f1c81 , xrpl-validator)
- **docs: update libxrpl version references to 3.1.3** (54a4f25 , xrpl-validator)

Appendix — commits

Time	Repo	Commit	Subject
23:43	xrpl-validator	59f1c81	chore(deps): upgrade Next.js dashboard to 15.5.18
