

XRPL Validator — Daily Engineering Report · 2026-05-19

Compiled retrospectively on 2026-09-23 from the git history. Scope: XRPL work only — the git history of [xrpl-validator](#) and the XRPL Rust SDK, the XRP Ledger itself (amendments) and XRPL research.

Summary

- 1 commit (xrpl-validator 1)

Engineering changes

- **fix(ws-sync): halt-on-mismatch + write-after-verify + lag breadcrumbs** (70f6c0d , xrpl-validator) Three layered fixes for the failure mode that crashed the validator on 2026-05-19: ws-sync silently lagged 51 ledgers behind the live edge, the watchdog forced a reconnect, recovery couldn't catch up, and the validator produced 263 consecutive state-hash MISMATCHes before dying. The pre-fix "log and move on" behaviour committed corrupt state.rocks data once and re-corrupted it every ledger after.
