

XRPL Validator — Daily Engineering Report • 2026-06-10

Compiled retrospectively on 2026-09-23 from the git history. Scope: XRPL work only — the git history of [xrpl-validator](#) and the XRPL Rust SDK, the XRP Ledger itself (amendments) and XRPL research.

Summary

- 1 commit (xrpl-validator 1)

Engineering changes

- **fix validator: disarm va-05 hard signing gate by default (XRPL_VA05_ENFORCE)** (2d471f3 , xrpl-validator) Reaudit 2026-06-10 finding F1 (SEV-1): the va-05 block was live-wired unconditionally, so any rebuild from this branch (3.2.0 forces one) would re-arm the gate that failed on 2026-05-31 — ws-sync's account_hash trails the live edge, pairing account_hash(N-lag) with header(N), mismatching every ledger and refusing all signing.
