Engineering changes

- **feat(dashboard): copilot investigate panel + ignore copilot/ backend** (afa3896 , xrpl-validator) Embeds the copilot investigate panel in the dashboard (live on :3778); next.config proxies to the copilot service. The /copilot backend is its own repo, so gitignore it here.
- **fix(dashboard): bump LIBXRPL badge 3.1.3 -> 3.2.0** (1c66cf1 , xrpl-validator) Validator runs libxrpl 3.2.0; header badge was a stale hardcoded literal.
