Engine findings fixed

- **fix(xrpl-ledger): F409 — an AMM teardown deletes every trust line in the pool's directory** (32a6397 , xrpl-validator) Mainnet #107330165 01DF0E1D0AE0: the last LP's tfWithdrawAll empties the BTC/BTC pool (rUnqjiCHbH3q), and rippled's deleteAMMAccount runs deleteAMMTrustLines (AMMUtils.cpp:237-280). That walks the pool's WHOLE owner directory through cleanupOnAccountDelete and deletes every trust line in it with deleteAMMTrustLine (View.cpp:3485-3528), not only the two asset lines. The directory still held another account's ...

- **fix(xrpl-ledger): F410 — CheckCash judges DeliverMin on what the flow delivered, not on the casher's balance difference** (40c5fbd , xrpl-validator) Mainnet #107344641 48AADD252342: rw13qV1w cashes rKedDTMd's check for 1,034,740 "589" (DeliverMin = the check's SendMax = 1,034,740, no transfer fee) onto a trust line holding 112,178.5615725964. rippled's CashCheck compares DeliverMin with the flow's delivered amount (result.actualAmountOut), exactly 1,034,740, and mainnet cashes it (tesSUCCESS). The engine measured delivery as the casher's balance after minus ...
