XRPL Validator — Daily Engineering Report · 2026-06-30

Period: 2026-06-30 00:00 to 24:00 US Eastern (2026-06-30 04:00 to 2026-07-01 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: data.xrpl.org agreement scores. Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); xrpl-validator merge records (they begin 2026-07-04); amendment data.

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 2 commits (0 with a recorded merge into main; xrpl-validator merge records begin 2026-07-04).

Service levels

No signing records for this day (they begin 2026-09-19).

External agreement, data.xrpl.org (UTC day 2026-06-30): 0.72555 (5,894 missed of 21,476). *data.xrpl.org scores UTC days from the validations its crawlers received.*

Native engine conformance

Earlier FFI shadow log (libxrpl applied against the validator's mirror; superseded by Step 1): 8 transaction-level differences recorded this day, across 2 ledgers. These were not triaged into receipts.

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

Merge records begin 2026-07-04; this day's commits are listed by commit date below.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **fix(ffi): make CallbackReadView succ upper bound exclusive (open interval)** (`6893bbe`, xrpl-validator) rippled's ReadView::succ contract is the OPEN interval (key, last). The OverlayedDbProvider::succ callback treated `last` as inclusive (k <= last) in both the snapshot scan and the overlay filter. Dormant for owner-dir / order-book walks (their `last` sentinel never equals a live key) but load-bearing for NFTokenMint: rippled locates a mint's target page via succ(first, nftpageMax(owner).next()), so an inclusive …
- **fix(ffi): make CallbackReadView succ upper bound exclusive (open interval)** (`59bcaec`, xrpl-validator) rippled's ReadView::succ contract is the OPEN interval (key, last). The OverlayedDbProvider::succ callback treated `last` as inclusive (k <= last) in both the snapshot scan and the overlay filter. Dormant for owner-dir / order-book walks (their `last` sentinel never equals a live key) but load-bearing for NFTokenMint: rippled locates a mint's target page via succ(first, nftpageMax(owner).next()), so an inclusive …

Independence program

No independence record for UTC day 2026-06-30; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Continuously-vesting token payment streams** (payments) Add a `Stream` ledger object (`ltSTREAM`, owner-reserved, `keylet::stream(account, sequence)`) and three transactors. `StreamCreate` locks XRP, an IOU
- **Confidential MPT balances via Groth16 proofs** (privacy) Add an `lsfMPTConfidential` flag to `MPTokenIssuance` and a new `MPTConfidentialSend` transaction; in confidential mode each `MPToken` stores `sfBalan
- **Account-level outbound spend policies** (accounts) Add an `AccountPolicy` ledger object (one per account, owner-reserved, `keylet::accountPolicy(account)`) set via a new `AccountPolicySet` transaction
- **Rentable Time-Limited NFTs** (nft) Reuse the NFTokenOffer machinery: add a tfLease flag to NFTokenCreateOffer and a new inner SField sfExpiration (UInt32 close-time) on the offer templa
- **Credential-Gated Token Transfers** (compliance) Add an optional sfDomainID (Hash256 keylet of a PermissionedDomain) to MPTokenIssuance. When set, the MPT transfer path (Payment / MPTSend) gains a pr
- **Native Oracle-Triggered Stop Orders** (dex) Add a tfTrigger flag to OfferCreate plus three SFields — sfTriggerOracle (Hash256 PriceOracle keylet), sfTriggerThreshold (Number), and sfTriggerDir (
- **Time-Locked Social Guardian Account Recovery** (accounts) Add a RecoverList ledger object (ltRECOVER_LIST, owner-reserved, keylet::recover(account)) set by a new RecoverSet transaction that registers guardian
- **Fee And Reserve Sponsorship For Onboarding** (fees) Add two optional common transaction fields, sfSponsor (AccountID) and sfSponsorSignature; when present, preclaim verifies the sponsor signed over the
- **Consensus-Native Randomness Beacon** (oracles) Add a RandomCommit ledger object (ltRANDOM, owner-reserved, keylet::random(account, sequence)) created by a RandomCommit transaction recording sfNonce

- **Atomic post-recovery key hygiene** (accounts) On RecoverFinish doApply, walk the owner directory to delete the account's SessionKey (g11) SLEs and reset any AccountPolicy (g18) spend-limit state i
- **Royalty-Locked NFTs: Ban Zero-Value Sell Offers** (nft) Add a new NFTokenMint flag tfTransferFeeLocked (packed as lsfTransferFeeLocked in the existing NFTokenID flag nibble, valid only when sfTransferFee >
- **Bounded Batch Sweep for Dust Objects** (fees) Add a new transaction ttOBJECT_SWEEP carrying sfSweepIDs, a bounded STVector256 (max 16 entries) of ledger-object keylets owned by the submitting Acco
- **Deterministic Volatility Surcharge for AMM Fees** (amm-defi) Add two SFields to the AMM ledger object: sfPriorClosingPrice, a spot-price snapshot (LP-token-implied ratio) taken automatically at the first swap to
- **Directory-node-touch metered fee primitive** (aidea) Generalize the critical analysis's mispricing finding into a reusable fee primitive: meter the actual number of owner-directory page inserts/merges/de
- **Pluggable deletability-predicate registry** (aidea) Extract g27's six inline 'safe to remove' checks into a small on-ledger-agnostic registry keyed by object type, so any future amendment (starting with

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
06-30 21:51	—	xrpl-validator	`6893bbe`	fix(ffi): make CallbackReadView succ upper bound exclusive (open interval)
06-30 22:08	—	xrpl-validator	`59bcaec`	fix(ffi): make CallbackReadView succ upper bound exclusive (open interval)

Times in UTC. A commit appears on the day it was committed to main or merged into it.
