XRPL Validator — Daily Engineering Report · 2026-07-10

Period: 2026-07-10 00:00 to 24:00 US Eastern (2026-07-10 04:00 to 2026-07-11 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04); data.xrpl.org agreement scores. Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data.

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 0 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

External agreement, data.xrpl.org (UTC day 2026-07-10): 0.92981 (1,510 missed of 21,513). *data.xrpl.org scores UTC days from the validations its crawlers received.*

Native engine conformance

Earlier FFI shadow log (libxrpl applied against the validator's mirror; superseded by Step 1): 64 transaction-level differences recorded this day, across 2 ledgers. These were not triaged into receipts.

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

No merges into main.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **fix(node): hold the validator's ledger feed position on unapplied ledger instead of skipping** (`5ea6c9e`, xrpl-validator) All three batch failure paths (metadata unavailable, tx-gate ENFORCE incomplete, process_ledger==false: aborted fetch / DB write failure / rolled-back MISMATCH) previously advanced last_processed past the failed ledger. A skipped delta permanently diverges state.rocks, so every later account_hash mismatches and halt-on-mismatch fires 3 ledgers later. 2026-07-10 halt: #105500328 aborted during the the reference node outage, was …

Independence program

No independence record for UTC day 2026-07-10; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Bonded Oracle Slashing via Deviation Challenge** (oracles) Add an optional sfBond (XRP) field to the ltORACLE object, lockable via OracleSet, and a new ttORACLE_CHALLENGE transaction (OracleChallenge) that let
- **Dual-Leg Atomic DvP Escrow** (settlement) Add a new ltDVP_ESCROW object (owner-reserved by the initiator, keylet::dvpEscrow(account, sequence)) created by DvPEscrowCreate, which locks Leg A (X
- **Condition-Gated Check Cashing** (payments) Add an optional sfCondition (crypto-condition, Hash256-class) SField to CheckCreate and the ltCHECK object, and require a matching sfFulfillment argum

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
07-10 12:15	—	xrpl-validator	`5ea6c9e`	fix(node): hold the validator's ledger feed position on unapplied ledger instead of skipping

Times in UTC. A commit appears on the day it was committed to main or merged into it.
