XRPL Validator — Daily Engineering Report · 2026-07-18

Period: 2026-07-18 00:00 to 24:00 US Eastern (2026-07-18 04:00 to 2026-07-19 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04); data.xrpl.org agreement scores. Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data.

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 0 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

External agreement, data.xrpl.org (UTC day 2026-07-18): 0.99991 (2 missed of 21,794). *data.xrpl.org scores UTC days from the validations its crawlers received.*

Native engine conformance

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

No merges into main.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **feat(xrpl-ledger): CheckCreate + NFTokenCreateOffer parity — 5 fully-green types** (`e93b4b3`, xrpl-validator)
- keylet: nft_offer_key (0x0071 'q'), nft_buy_offers_key (0x0068 'h'), nft_sell_offers_key (0x0069 'i') — all three mainnet-verified byte-for-byte against #105666725 before implementation - nftoken: NFT offers were keyed in the DEX offer space (0x006F) — every created offer landed on a provably wrong key. One-helper fix keeps accept/cancel consistent. CreateOffer now inserts into the creator's owner dir AND the …
- **feat(xrpl-ledger): ticket consumption in apply_common — OfferCancel 19/19** (`ad0f628`, xrpl-validator) The '16 OfferCancel stragglers' were not OfferCancel bugs: every one was a TICKETED transaction. rippled's SeqProxy consumption deletes the Ticket object, unlinks it from the owner directory, and decrements OwnerCount + TicketCount — native's apply_common only skipped the Sequence increment. Root-caused from real meta (AccountRoot diff {Balance, OwnerCount, TicketCount} + Ticket DeletedNode); ticket keylet …

Independence program

No independence record for UTC day 2026-07-18; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Commit-Reveal Randomness Beacon for Mints** (oracles) Add a round-addressed ledger object ltBEACON (keylet::beacon(roundSeq)) filled by two new transactors: ttBEACON_COMMIT, which posts sfCommitHash plus
- **Issuer Reserve Attestation Registry** (audit) Add an owner-reserved ltATTESTATION object (keylet::attestation(issuer, subjectID, seq)) written by a new AttestationSet transaction carrying sfAttest
- **Deletable Segregated Sub-Accounts** (custody) Add a SubAccountCreate transaction that opens a pseudo-account-style ltSUBACCOUNT object (keylet::subAccount(parent, seq), no independent signing key)

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
07-18 16:35	—	xrpl-validator	`e93b4b3`	feat(xrpl-ledger): CheckCreate + NFTokenCreateOffer parity — 5 fully-green types
07-18 20:57	—	xrpl-validator	`ad0f628`	feat(xrpl-ledger): ticket consumption in apply_common — OfferCancel 19/19

Times in UTC. A commit appears on the day it was committed to main or merged into it.
