XRPL Validator — Daily Engineering Report · 2026-07-26

Period: 2026-07-26 00:00 to 24:00 US Eastern (2026-07-26 04:00 to 2026-07-27 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04); data.xrpl.org agreement scores. Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data.

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 0 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

External agreement, data.xrpl.org (UTC day 2026-07-26): 1.00000 (0 missed of 21,741). *data.xrpl.org scores UTC days from the validations its crawlers received.*

Native engine conformance

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

No merges into main.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **fix(nftoken): decode the base58 Issuer field on authorised-minter mints** (`881e160`, xrpl-validator) NFTokenMint's decode_account_id was hex-only, but the probe does not hex-normalise the Issuer field (it is absent from ACCOUNT_FIELDS), so an authorised-minter mint's base58 Issuer silently failed to decode and fell back to tx.account -- the minter. One wrong account cascaded two ways: MintedNFTokens was credited to the minter instead of the issuer, and the NFTokenID embedded the minter, so the token's low-96 -- …
- **fix(clawback): decode the base58 holder from Amount.issuer** (`f6ed033`, xrpl-validator) Clawback resolves the token holder from the nested Amount.issuer field, but misc.rs::decode_account_id was hex-only. The probe hex-normalises only top-level ACCOUNT_FIELDS, never a nested amount object, so Amount.issuer arrives as a base58 r-address -- decoding it hex-only returned None and the transactor rejected a valid clawback as Malformed. A spurious reject is consensus-relevant: we would drop a tx mainnet …

Docs and operations

- **docs: honest README + PROGRESS — accurate architecture + status** (`34a549a`, xrpl-validator)

Independence program

No independence record for UTC day 2026-07-26; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Netted Settlement Across Segregated Sub-Accounts** (custody) Add a new transaction ttSUBACCOUNT_NET carrying a bounded array (max 32) of sfNetLeg entries, each pairing two SubAccount keylets under the Segregated
- **Stealth Payment Pseudo-Accounts** (privacy) Add a StealthMeta ledger object (owner-reserved, keylet::stealthMeta(account)) published via a new SetStealthMeta transaction carrying sfViewPublicKey
- **Escrow-Backed Corporate Actions for MPTs** (rwa) Add a CorporateAction ledger object (ltCORPORATE_ACTION, owner-reserved, keylet::corpAction(issuanceID, sequence)) created by a new MPTokenCorporateAc

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
07-26 13:32	—	xrpl-validator	`34a549a`	docs: honest README + PROGRESS — accurate architecture + status
07-26 16:43	—	xrpl-validator	`881e160`	fix(nftoken): decode the base58 Issuer field on authorised-minter mints
07-26 17:25	—	xrpl-validator	`f6ed033`	fix(clawback): decode the base58 holder from Amount.issuer

Times in UTC. A commit appears on the day it was committed to main or merged into it.
