XRPL Validator — Daily Engineering Report · 2026-07-30

Period: 2026-07-30 00:00 to 24:00 US Eastern (2026-07-30 04:00 to 2026-07-31 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04); data.xrpl.org agreement scores. Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data.

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 0 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

External agreement, data.xrpl.org (UTC day 2026-07-30): 0.99773 (49 missed of 21,623). *data.xrpl.org scores UTC days from the validations its crawlers received.*

Native engine conformance

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

No merges into main.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **feat(ledger): NFTokenMint carrying Amount also rests a sell offer** (`2488343`, xrpl-validator) featureNFTokenMintOffer: a mint with `Amount` mints the token AND rests a sell offer in one transaction. rippled factors this as `nft::tokenOfferCreateApply` and calls it from both NFTokenCreateOffer and NFTokenMint (NFTokenMint.cpp:312-330). We minted but never created the offer, losing exactly three mutations every time — the NFTokenOffer, its sell-offer directory page, and the owner directory entry. 11 cases in …
- **fix(ledger): AMMWithdraw by LPTokenIn pays out both pool assets** (`e7b7d4d`, xrpl-validator) tfLPToken (0x00010000) withdrawals name only how many LPTokens to redeem and receive BOTH pool assets in proportion — the transaction carries no Amount or Amount2 at all. Our apply path only ever moved Amount/Amount2, found neither, and so burned the LP tokens while paying out nothing. That is exactly why every case was missing the two RippleStates and the AccountRoot a payout touches.
- **fix(ledger): pass the page hint when a payment tears down a trust line** (`95eb59c`, xrpl-validator) A line spent to zero mid-payment reverts to default and is deleted, which must remove it from BOTH owner directories. We called owner_dir_remove for both sides but passed None as the page hint, while TrustSet's trustDelete passes the real LowNode/HighNode (trust_set.rs:371-375).
- **fix(ledger): a bridge leg with a pool but no book carries nothing** (`413368a`, xrpl-validator) All 8 cases were Flags=65536 exactly — tfPassive, buy side, IOU<->IOU with no XRP leg — so every one takes the auto-bridge path. That uniformity is what made the cluster tractable.
- **fix(probe): hydrate the ISSUERS' owner directories for OfferCreate** (`e10fe45`, xrpl-validator) A crossing OfferCreate can hand the taker an IOU it has never held, creating a trust line that appends to BOTH sides' owner

directories. The probe hydrated only the ACCOUNT's, never the issuers' — so for a real issuer, whose directory runs to thousands of pages, dir_insert could not see the existing directory and invented a fresh root where mainnet modified a tail page.

Independence program

No independence record for UTC day 2026-07-30; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Default Autobridge via Governed Bridge Assets** (dex) Add an AutobridgeCurrencies list (up to 4 non-XRP assets, IOU or MPT) to the existing validator fee-voting singleton alongside base fee/reserve, reusi
- **Travel-Rule Channel with Attestation Registry** (compliance) Add sfTravelRuleBlob, a size-bounded (max 8KB) opaque ciphertext SField payable on Payment transactions, required only when the destination AccountRoo
- **Native Accrual-Rate Rebasing for MPT Funds** (rwa) Add an lsfMPTAccruing flag plus sfAccrualRatePerLedger (bounded drops/IOU-units per ledger-close) and sfLastAccrualTime to MPTokenIssuance, reusing th

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
07-30 15:02	—	xrpl-validator	`2488343`	feat(ledger): NFTokenMint carrying Amount also rests a sell offer
07-30 16:26	—	xrpl-validator	`e7b7d4d`	fix(ledger): AMMWithdraw by LPTokenIn pays out both pool assets
07-30 17:26	—	xrpl-validator	`95eb59c`	fix(ledger): pass the page hint when a payment tears down a trust line
07-30 18:24	—	xrpl-validator	`413368a`	fix(ledger): a bridge leg with a pool but no book carries nothing
07-31 02:08	—	xrpl-validator	`e10fe45`	fix(probe): hydrate the ISSUERS' owner directories for OfferCreate

Times in UTC. A commit appears on the day it was committed to main or merged into it.
