XRPL Validator — Daily Engineering Report · 2026-08-07

Period: 2026-08-07 00:00 to 24:00 US Eastern (2026-08-07 04:00 to 2026-08-08 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04). Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data; data.xrpl.org agreement scores (scored days begin 2026-04-04; some days have none).

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 0 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

Native engine conformance

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

No merges into main.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **feat(xrpl-ledger): DX_ULP — the 1-ulp upper bound is unobservable, and the note was backwards** (`f2d9d9a`, xrpl-validator) Hunted for a ledger where the composed upper bound's last digit decides an admission, per the open item in 005ad9a. There isn't one.
- **fix(xrpl-node): the FFI oracle replayed every old fixture under TODAY'S rules** (`a191b79`, xrpl-validator) Re-minting the stale freshfinds/105663160 fixture (it lacked `tx_json` and had been skipped by every gate since 24 July) surfaced this.
- **fix(xrpl-node): prefetch the NFT offer's OWNER — the accept names it by hash** (`60fb653`, xrpl-validator) Root cause of #105663160 `5CCAAE138F560F07`, and it is OURS, not rippled's.
- **refactor(xrpl-ledger): remove DX_SEL — it now compares an abandoned model** (`17a99ef`, xrpl-validator) DX_SEL was added in dbb9110 to find a ledger where our estimate-based strand selection differed from rippled's upper-bound one. It found the answer, the answer was acted on, and the detector outlived its premise: since 03c2cb9 the engine SELECTS by that upper-bound model (`order`), so DX_SEL was comparing an abandoned model against the live one and reporting "mismatches" that described nothing real.
- **fix(xrpl-ledger): destination checks come before the funding check** (`5626357`, xrpl-validator) #106136429 `6FF692D40C4F`, from the 2026-08-07 fresh batch. The FFI leg was clean, so the pre-state was sound and the engine was wrong.
- **fix(xrpl-ledger): a payment crosses the payer's own offer** (`8d8ca2d`, xrpl-validator) #106137720 `F2C989D4843A`, from the 2026-08-07 fresh batch. FFI leg clean, so the pre-state was sound and the engine was wrong.
- **feat(xrpl-ledger): max_offer — rippled's single-path AMM slice, trace-exact** (`a171405`, xrpl-validator) Groundwork for the AMM bridge slice-sizing family, with the two specimens from the 2026-08-07 batch. NOT wired in; see below.

Tests and campaigns

- **test(xrpl-ledger): the 3 red regression tests encoded a 10 XRP reserve** (`751d5d4` , xrpl-validator)

Independence program

No independence record for UTC day 2026-08-07; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Validator Bond, Slashing, and Reputation Score** (consensus) Add a new owner-reserved ledger object ltVALIDATOR_BOND (keylet::validatorBond(masterPubKey)) holding sfBondAmount, sfValidatorPublicKey, sfReputation
- **Reputation-Discounted Collateral for On-Ledger Loans** (lending) Add a protocol-maintained ledger object ltLOAN_CREDIT_SCORE (keylet::loanCreditScore(borrower), no owner reserve) tracking sfOnTimeRepayments, sfDefau
- **Delegated Compliance Approval for Restricted Transfers** (rwa) Extend XLS-75 Permission Delegation's DelegateSet transaction with a new granular permission code PermissionTransferApproval, scoped by the issuer to

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
08-07 05:10	—	xrpl-validator	`f2d9d9a`	feat(xrpl-ledger): DX_ULP — the 1-ulp upper bound is unobservable, and the note was backwards
08-07 13:46	—	xrpl-validator	`751d5d4`	test(xrpl-ledger): the 3 red regression tests encoded a 10 XRP reserve
08-07 14:53	—	xrpl-validator	`a191b79`	fix(xrpl-node): the FFI oracle replayed every old fixture under TODAY'S rules
08-07 16:13	—	xrpl-validator	`60fb653`	fix(xrpl-node): prefetch the NFT offer's OWNER — the accept names it by hash
08-07 18:36	—	xrpl-validator	`17a99ef`	refactor(xrpl-ledger): remove DX_SEL — it now compares an abandoned model
08-07 21:17	—	xrpl-validator	`5626357`	fix(xrpl-ledger): destination checks come before the funding check
08-07 22:00	—	xrpl-validator	`8d8ca2d`	fix(xrpl-ledger): a payment crosses the payer's own offer
08-08 03:08	—	xrpl-validator	`a171405`	feat(xrpl-ledger): max_offer — rippled's single-path AMM slice, trace-exact

Times in UTC. A commit appears on the day it was committed to main or merged into it.
