XRPL Validator — Daily Engineering Report · 2026-08-11

Period: 2026-08-11 00:00 to 24:00 US Eastern (2026-08-11 04:00 to 2026-08-12 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04). Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data; data.xrpl.org agreement scores (scored days begin 2026-04-04; some days have none).

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 0 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

Native engine conformance

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

No merges into main.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **fix(xrpl-ledger): real LP token math for two-asset deposits and all withdrawals** (`c9ac386`, xrpl-validator) Removes the last of the 1e7 LPToken placeholders from the deposit/withdraw paths. AMMWithdraw 7 -> 0 hits, AMMDeposit 7 -> 3; the AMM value family is now 3, from 23 at gate 46.
- **fix(xrpl-ledger): a single-asset deposit pays what its adjusted tokens are worth** (`5197c37`, xrpl-validator) CLOSES THE AMM VALUE FAMILY: 23 hits at gate 46 -> 0. #105813899 2C8C37F9 was the last one, 55/55 with no DX_VALCHECK output at all.
- **fix(xrpl-ledger): a fully-consumed offer transfers its own amounts verbatim** (`dd4991a`, xrpl-validator) OfferCreate value hits 48 -> 26 across the ledgers carrying them, with the XRP family almost gone (AccountRoot.Balance 18 -> 2). No mutation-set regressions.
- **fix(xrpl-ledger): a payment charges the input issuer's rate on EVERY hop** (`5c16b88`, xrpl-validator) Payment value hits 12 -> 4. #105924683 B3AA3ACC — the largest remaining error in the whole backlog at 2.96e-3, 5 hits — closes outright: 73/73 with no DX_VALCHECK output.
- **fix(xrpl-ledger): a bridged taker pays the input issuer's transfer fee** (`94a028e`, xrpl-validator) Closes the two largest remaining OfferCreate errors. #105887283 4A13D048 goes 88/88 with no DX_VALCHECK output at all; #105954798 D5887FD7 drops from 1.34e-4 to 2.0e-11.
- **fix(xrpl-ledger): to_amount honours round-to-NEAREST instead of flooring it** (`6de2684`, xrpl-validator) Closes the largest remaining cluster: #105843839 C1F9FB1F, 6 hits -> 0. That ledger now carries one pre-existing 1.5e-11 Payment residue and nothing else, 125/125.
- **fix(xrpl-ledger): an XRP residual ceils to whole DROPS, not to 16 digits** (`df3c8f2`, xrpl-validator) #105672435 B409D45C -> 0 hits, 118/118. It was the largest genuine error left (6.05e-6) and the last one above 2e-6.

Independence program

No independence record for UTC day 2026-08-11; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Oracle-Verified Account Spend Caps** (accounts) Add an AccountPolicy ledger object (owner-reserved, keylet::accountPolicy(account)) set by a new AccountPolicySet transaction, carrying sfMaxOutboundV
- **Credential-Gated Inbound Firewall Rules** (compliance) Add an lsfFirewall flag settable via AccountSet plus a bounded FirewallRule directory (ltFIREWALL_RULE, owner-reserved, keylet::firewallRule(account,
- **Sponsored Multi-Destination Remittance Payments** (payments) Implement ttREMIT per XLS-55: a single transaction carrying a bounded STArray sfAmounts (max 8 entries) of mixed XRP/IOU/MPT amount-destination pairs,

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
08-11 13:20	—	xrpl-validator	`c9ac386`	fix(xrpl-ledger): real LP token math for two-asset deposits and all withdrawals
08-11 14:16	—	xrpl-validator	`5197c37`	fix(xrpl-ledger): a single-asset deposit pays what its adjusted tokens are worth

Committed	Merged into main	Repo	Commit	Subject
08-11 15:50	—	xrpl-validator	`dd4991a`	fix(xrpl-ledger): a fully-consumed offer transfers its own amounts verbatim
08-11 17:53	—	xrpl-validator	`5c16b88`	fix(xrpl-ledger): a payment charges the input issuer's rate on EVERY hop
08-11 20:07	—	xrpl-validator	`94a028e`	fix(xrpl-ledger): a bridged taker pays the input issuer's transfer fee
08-11 22:36	—	xrpl-validator	`6de2684`	fix(xrpl-ledger): to_amount honours round-to-NEAREST instead of flooring it
08-12 02:18	—	xrpl-validator	`df3c8f2`	fix(xrpl-ledger): an XRP residual ceils to whole DROPS, not to 16 digits

Times in UTC. A commit appears on the day it was committed to main or merged into it.
