XRPL Validator — Daily Engineering Report · 2026-08-16

Period: 2026-08-16 00:00 to 24:00 US Eastern (2026-08-16 04:00 to 2026-08-17 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04). Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data; data.xrpl.org agreement scores (scored days begin 2026-04-04; some days have none).

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 1 commit merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

Native engine conformance

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

Merged	Repo	Commit	Subject
17:37 UTC	xrpl-validator	`43fdc99`	feat(node): S3 — a proposal's tx-set hash is a SHAMap root, not a concatenation

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **fix(xrpl-ledger): AccountDelete walks the owner DIRECTORY — OwnerCount 0 is not "owns nothing"** (`a31296a`, xrpl-validator) Our only gate was `OwnerCount == 0`. #106322004 77C5E61D has OwnerCount 0 AND owns an Escrow, and those are not contradictory: an escrow that names this account as DESTINATION is linked into its owner directory, but the reserve sits with the escrow's CREATOR, so the destination's count never moves. The count says "owns nothing" while the directory says otherwise.
- **fix(xrpl-ledger): NFTokenBurn takes the token's OUTSTANDING OFFERS with it** (`1559d5f`, xrpl-validator) We removed the token from its page and bumped BurnedNFTokens, and stopped — leaving offers pointing at an NFT that no longer exists. `NFTokenBurn::doApply` deletes up to 500, SELL directory first: std::size_t const deletedSellOffers = nft::removeTokenOffersWithLimit(view(), keylet::nftSells(id), kMaxDeletableTokenOfferEntries); if (kMaxDeletableTokenOfferEntries > deletedSellOffers) …
- **fix(xrpl-ledger): a rested XRP residual rounds by mulRound, not by a plain ceiling** (`a8b01c7`, xrpl-validator) The bookend to `ff1e752`. There, `TOffer::limitOut` uses `ceilOutStrict` and gets a TRUE ceiling. Here, `flowCross`'s residual uses plain `mulRound`: afterCross.in = mulRound(afterCross.out, rate, takerAmount.in.asset(), true);
- **feat(node): S3 — a proposal's tx-set hash is a SHAMap root, not a concatenation** (`43fdc99`, xrpl-validator) `compute_tx_set_hash` was a placeholder: sort the ids, concatenate, SHA512Half once. That shares no structure with a SHAMap, so every proposal we generated named a set hash no peer could ever agree with. Harmless so far only because nothing consumes it yet — M2a is where it would have started mattering.

Independence program

No independence record for UTC day 2026-08-16; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Amendment Retirement Ballots** (governance) Add an author-declared sfRetirable flag on an amendment's feature-registry entry, marking it eligible for reversal because its effects are confined to
- **Time-Bounded NFT Leases** (nft) Add a new owner-reserved ltNFTOKEN_LEASE ledger object (keylet::nftLease(NFTokenID)) created by a new NFTokenCreateLease transaction carrying sfNFToke
- **Credential-Gated Settlement Finality Receipts** (settlement) Add a tfFinalityReceipt flag usable on Payment and the native atomic DvP settlement transaction; when set by an account holding a designated Settlemen

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
08-16 14:59	—	xrpl-validator	`a31296a`	fix(xrpl-ledger): AccountDelete walks the owner DIRECTORY — OwnerCount 0 is not "owns nothing"
08-16 16:14	—	xrpl-validator	`1559d5f`	fix(xrpl-ledger): NFTokenBurn takes the token's OUTSTANDING OFFERS with it
08-16 17:32	—	xrpl-validator	`a8b01c7`	fix(xrpl-ledger): a rested XRP residual rounds by mulRound, not by a plain ceiling
08-16 17:37	08-16 17:37	xrpl-validator	`43fdc99`	feat(node): S3 — a proposal's tx-set hash is a SHAMap root, not a concatenation

Times in UTC. A commit appears on the day it was committed to main or merged into it.
