XRPL Validator — Daily Engineering Report · 2026-08-26

Period: 2026-08-26 00:00 to 24:00 US Eastern (2026-08-26 04:00 to 2026-08-27 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04). Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data; data.xrpl.org agreement scores (scored days begin 2026-04-04; some days have none).

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 2 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

Native engine conformance

Earlier FFI shadow log (libxrpl applied against the validator's mirror; superseded by Step 1): 739 transaction-level differences recorded this day, across 6 ledgers. These were not triaged into receipts.

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

Merged	Repo	Commit	Subject
16:07 UTC	xrpl-validator	`c727fcf`	fix(node): the validator's ledger feed tx-blob fetch validates it received the requested CLOSED ledger — a foreign response (lgrNotFound failover) fed shadow-verify a neighboring ledger's tx set in txid order, 739 phantom seq-divergences across 6 bursts
18:02 UTC	xrpl-validator	`68bc819`	fix(node): the validator's ledger feed trusts only validated views — trust gate on every ledger/ledger_entry consumer, and the tx-blob guard reads result.ledger_index (sibling), not result.ledger.ledger_index

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **fix(node): the validator's ledger feed tx-blob fetch validates it received the requested CLOSED ledger — a foreign response (lgrNotFound failover) fed shadow-verify a neighboring ledger's tx set in txid order, 739 phantom seq-divergences across 6 bursts** (`c727fcf`, xrpl-validator)
- **fix(node): the validator's ledger feed trusts only validated views — trust gate on every ledger/ledger_entry consumer, and the tx-blob guard reads result.ledger_index (sibling), not result.ledger.ledger_index** (`68bc819`, xrpl-validator) A desynced upstream (the reference node, 13:43) served non-validated answers; state writes from them cost a wipe+resync (SEV-1 halt #106560616). With the gates, a sick upstream = hold position, exactly like an unreachable one.

Independence program

No independence record for UTC day 2026-08-26; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **Recurring Pull Claims for Payment Channels** (payments) Add sfClaimCap (Amount) and sfClaimInterval (UInt32, close-time seconds) to the PayChannel object, settable at PayChanCreate/PayChanFund, plus a new s
- **Oracle-Median Escrow Finish Condition** (oracles) Add sfOracleIDs (STVector256, bounded to 8 PriceOracle keylets) and sfMedianCondition (an Amount threshold plus a GTE/LTE comparison flag) to Escrow,
- **Step-Up Multisig Spend Policy Object** (custody) Add a new ltWITHDRAWAL_POLICY object (owner-reserved, keylet::withdrawPolicy(account)) set via a WithdrawalPolicySet transaction carrying sfDailyOutbo

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
08-26 16:07	08-26 16:07	xrpl-validator	`c727fcf`	fix(node): the validator's ledger feed tx-blob fetch validates it received the requested CLOSED ledger — a foreign response (lgrNotFound failover) fed shadow-verify a neighboring ledger's tx set in txid order, 739 phantom seq-divergences across 6 bursts
08-26 18:02	08-26 18:02	xrpl-validator	`68bc819`	fix(node): the validator's ledger feed trusts only validated views — trust gate on every ledger/ledger_entry consumer, and the tx-blob guard reads result.ledger_index (sibling), not result.ledger.ledger_index

Times in UTC. A commit appears on the day it was committed to main or merged into it.
