XRPL Validator — Daily Engineering Report · 2026-08-27

Period: 2026-08-27 00:00 to 24:00 US Eastern (2026-08-27 04:00 to 2026-08-28 04:00 UTC). Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: xrpl-validator merge records (they begin 2026-07-04). Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); signing records (they begin 2026-09-19); Step 1 receipt records (they begin 2026-08-29); Steps 2–5 receipt records (they begin 2026-10-09); deployment records (they begin 2026-09-11); amendment data; data.xrpl.org agreement scores (scored days begin 2026-04-04; some days have none).

Status

Not assessed — no signing records for this day.

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** no signing records for this day (they begin 2026-09-19).
- **Native engine:** no receipt records for this day (they begin 2026-08-29).
- **Changes:** 0 deployments, 0 commits merged into main.

Service levels

No signing records for this day (they begin 2026-09-19).

Native engine conformance

No receipt records for this day (Step 1 records begin 2026-08-29, Steps 2–5 records 2026-10-09).

Live counters are kept only for the current run; none exist for a past day.

Receipt register

No receipt records for this day (Step 1 records begin 2026-08-29).

Incidents

Not assessed: no signing records for this day.

Change log

Deployments

No deployment records before 2026-09-11.

Merged into main

No merges into main.

Findings fixed

No engine findings merged into main this day.

Other engineering changes

- **fix(xrpl-ledger): a tfSell crossing's stream trails the whole in-limit book — trial past live offers, reap the dead — and probe book hydration seeds at the book base** (`e6f0192`, xrpl-validator) rippled sizes tfSell with an unbounded-out sentinel: the rev stream trial-consumes every in-limit live offer and keeps stepping, permRm'ing dead offers it lands on; only a beyond-limit live offer ends the walk. Four exit sites taught the rule. Probe-side: book_offers hides expired tips like unfunded ones — seed the ledger_data walk at base24+zeros (the 'marker must exist' constraint is false on 3.3.0). New receipts: …
- **fix(xrpl-ledger): AMMVote applyVote ported for real — wrapped VoteEntry, VoteWeight from live LP balances, lowest-weight eviction, weighted-average TradingFee** (`1478907`, xrpl-validator) The stub wrote flat weightless entries; the codec rightly refused to encode them and every fresh-window replay died at the first AMMVote (#106589344, ENCODE-ERR then cascade). First specimen verified by the fresh-window replay sailing through the vote ledger: 66 clean until the next (unrelated) frontier.

Docs and operations

- **revert(xrpl-ledger): back out the sell-trailing walk pending whole-offer-trial rev semantics — the probe hydration seed stays** (`6d90a33`, xrpl-validator)

Independence program

No independence record for UTC day 2026-08-27; records begin 2026-10-20.

Network

No ledger records for this day: the reference node holds ledgers from 2026-10-04 22:52 UTC (#107,436,647).

Amendment watch

No amendment records for this day.

Open items

None.

Corrections to earlier reports

None.

XRPL research

Automated research — candidate amendment ideas

Ideas generated and prior-art-checked by the XRPL Amendment Board, an automated research tool (read-only board: iceland.halcyon-names.io). They are exploration leads, not proposals.

- **MPC Threshold-Signature Escrow Release** (custody) Register a new fulfillment type in the CryptoConditionsSuite type table for aggregate threshold signatures (e.g. FROST/BLS), and add an owner-reserved
- **Tick-Quantized Trigger Offers** (dex) Add a tfTriggerOffer flag to OfferCreate plus two SFields: sfTriggerQuality (a price ratio pre-quantized to the order book's existing TickSize) and sf
- **Expiring MPToken Holder Authorization** (tokens) Add an optional sfExpiration (ledger index or close-time) to the MPToken object, settable at MPTokenAuthorize time and refreshable by resubmitting MPT

Appendix — commits

Committed	Merged into main	Repo	Commit	Subject
08-28 00:29	—	xrpl-validator	`e6f0192`	fix(xrpl-ledger): a tfSell crossing's stream trails the whole in-limit book — trial past live offers, reap the dead — and probe book hydration seeds at the book base
08-28 01:39	—	xrpl-validator	`6d90a33`	revert(xrpl-ledger): back out the sell-trailing walk pending whole-offer-trial rev semantics — the probe hydration seed stays
08-28 02:26	—	xrpl-validator	`1478907`	fix(xrpl-ledger): AMMVote applyVote ported for real — wrapped VoteEntry, VoteWeight from live LP balances, lowest-weight eviction, weighted-average TradingFee

Times in UTC. A commit appears on the day it was committed to main or merged into it.
