XRPL Validator — Daily Engineering Report · 2026-09-19

Period: 2026-09-19 00:00 to 24:00 US Eastern (2026-09-19 04:00 to 2026-09-20 04:00 UTC); ledgers #107,083,734 to #107,106,171. Every count from the ledger and the validator's logs stops at #107,106,171. Generated 2026-10-21 00:47 EDT by report generator v3.0. Sources: the XRP Ledger (ledger headers and amendments, read from a reference rippled node), the validator's signing log and receipt logs, the deployment pipeline's gate, soak and health records, the git history of xrpl-validator and the XRPL Rust SDK, and data.xrpl.org. Scope: XRPL work only.

Revised on 2026-10-21 in report format v3; the original is kept in this repository's history. Built only from records that exist for this day. Available: the day's first and last ledger, from a public full-history server; signing records (part of the day); Step 1 receipt records (they begin 2026-08-29); deployment records (they begin 2026-09-11); xrpl-validator merge records (they begin 2026-07-04); amendment data (carried from the original report). Not available: ledger headers (the reference node holds ledgers from 2026-10-04 22:52 UTC); Steps 2–5 receipt records (they begin 2026-10-09); data.xrpl.org agreement scores (scored days begin 2026-04-04; some days have none).

Status

Not assessed — signing records cover only part of the day (from #107,095,414).

Criteria. Normal: coverage outside planned maintenance at or above the 99.9% objective, every validation agreed with the network's validated ledger, and no engine receipt is open. Degraded: coverage below the objective, or an open engine receipt. Impaired: any validation that disagreed with the network, or coverage below 90%.

Executive summary

- **Validator:** signed 10,758 of the 10,758 ledgers the network closed (100.000%) (agreement not checked: the ledgers' hashes are no longer held).
- **Native engine:** 42 engine receipts recorded (6 fixed, 0 explained, 36 without a recorded fix).
- **Changes:** 2 deployments (cycles 144, 145), 8 commits merged into main.

Service levels

Measure	Value
Ledgers closed by the network	10,758
Validations issued	10,758
Coverage (validations / ledgers closed)	100.000%
Validations matching the network's validated ledger hash	not checked: the reference node no longer holds these ledgers' hashes
Unsigned during planned restarts	0
Unsigned outside maintenance	0
Coverage outside planned maintenance (objective 99.9%)	100.000%
Restarts	0

Measure	Value
Basis: the hash the first peer announced as accepted (before cycle 183)	10,758

Signing was measured from ledger #107,095,414; earlier ledgers of the day had no log.

The basis rows sum to validations issued. Coverage counts the validations the validator issued for ledgers the network closed in the period. Agreement compares each validation's ledger hash with the network's validated hash for that ledger. data.xrpl.org scores UTC days from the validations its crawlers received, so it can differ.

Native engine conformance

Ledgers with a receipt in the period (#107,083,734–#107,106,171), by step:

Step 1 · native engine	42
Step 2 · records	0
Step 3 · order	0
Step 4 · peer data	0
Step 4 · validations	0
Step 5 · own hash	0
Writer	0

Live counters are kept only for the current run; none exist for a past day.

A receipt is recorded whenever the validator's own work differs from the network's, or the network's trusted validations reached it short of quorum. One ledger flagged by several steps is one receipt. Dispositions: fixed (with the finding, commit and deployment), explained (not a defect, with the reason), or open. Receipt and incident IDs are numbered per report: R-01 here is R-2026-09-19-01, INC-01 is INC-2026-09-19-01. Times are not shown where the reference node no longer holds the ledger.

2 more receipts (#107,105,811–#107,105,984) are in the record and not listed individually; their dispositions: 1 fixed, 1 no disposition recorded.
