Engineering changes

- **feat(node): independence Step 1 — the amendment guard, the signature drop count, a validator list that fails closed** (`6c8ebc8` , xrpl-validator) 1.1 The amendment guard (amendment_guard.rs), our own "amendment blocked". The native shadow hands it every ledger's Amendments object. An enabled amendment on neither ENGINE_KNOWN (the 97 enabled at #107606611, plus fixCleanup3_4_0, ported) nor KNOWN_GAP (empty) is an ALARM; one with majority that the engine has not built is a warning. It reports in /api/amendments ("guard") and on /metrics …

Amendment watch

Read from the XRP Ledger: the Amendments object as of the last ledger of the day, and the day's EnableAmendment pseudo-transactions.
