XRPL Validator — Daily Engineering Report · 2026-10-18

Generated 2026-10-19 00:20 EDT. Scope: XRPL work only — the git history of xrpl-validator and the XRPL Rust SDK, the live native-engine shadow, the reference rippled node, the XRP Ledger itself (amendments) and XRPL research.

Summary

- **2 commits** (xrpl-validator 2)
- Live shadow: 5,581/5,581 ledgers fully matched, 548,667 transactions, 0 engine receipts in the current soak
- Amendment **fixCleanup3_4_0** held majority (since 2026-10-09 09:34 UTC); activation due ~2026-10-23 09:34 UTC

Live validator and native engine

Snapshot at generation time.

Measure	Value
Ledgers compared (current run)	5,581
Ledgers fully matched	5,581
Transactions applied natively	548,667
Result mismatches	0
Byte mismatches	0
Missing / extra keys	0 / 0
Batch inner-result mismatches	0
Engine receipts (current soak)	0
Live engine build running since	2026-10-18 18:17 EDT
Reference rippled	3.4.1, full, validated #107,754,174

Engineering changes

- **fix(peer): our validations get their own queue and go to every regular peer; peers' transactions are no longer relayed to the hubs** (`a6ab3ee`, xrpl-validator) data.xrpl.org counted 53 of 19,441 ledgers missed in a day, all of them signed. Two ways a signed validation was lost: - It shared a 2,000-place queue to the hubs with every transaction a peer sent us. A ledger of 1,000-2,000 transactions overflowed it, and a session that fell behind skipped the oldest frames, our validation among them (#107741340: four hubs connected, three public servers never saw it). - It went …
- **fix(validator): sign a ledger only once the trusted validators reach quorum on its hash** (`d540e6e`, xrpl-validator) Until now the validator signed the hash the first peer announced as accepted. On mainnet #107746977 and #107747014 (18 Oct) that peer had built another ledger, so we signed a hash the network never validated, and data.xrpl.org scored both ledgers missed.

Amendment watch

Read from the XRP Ledger: the Amendments object as of the last ledger of the day, and the day's EnableAmendment pseudo-transactions.

Amendment	Majority since	Activation due
fixCleanup3_4_0	2026-10-09 09:34 UTC	2026-10-23 09:34 UTC

Amendments enabled on mainnet: 97.

Appendix — commits

Time	Repo	Commit	Subject
10:42	xrpl-validator	`a6ab3ee`	fix(peer): our validations get their own queue and go to every regular peer; peers' transactions are no longer relayed to the hubs
17:33	xrpl-validator	`d540e6e`	fix(validator): sign a ledger only once the trusted validators reach quorum on its hash
